Furniture & Fittings

"Our stairs must be green!"

"Most home owners have a strong desire to be environmentally responsible. They want their home to be built using products that are sympathetic to the environment. That's why Rossdale specify Stair Lock EO-MDF stairs exclusively."

- Craig and Ross Robinson

Stair Lock is the first and only stair manufacturer in Australia whose product has been awarded the internationally recognised Good Environmental Choice Certification, attracting precious Green Star Credits. Stair Lock is the first in Australia to use **EO-MDF** exclusively, which has exceptionally low toxic emission levels. Stair Lock is environmentally innovative from a full life cycle perspective - using material fibre from plantation forests and sawmill residue, saving greenhouse gas emissions and precious resource.
